with IT law experience

Legal experience

Innovative People Ltd (IT integrator and IT outsource, Moscow, Russia)

IT Lawyer, 06.2017 – 07.2019

The company has a wide range of competences in IT: integration of BPM solutions, automation of business with CRM and IT outsourcing. Worked with waterfall and agile methods.

- Communicated between all the company's IT professionals: developers, managers, stakeholders, financial officers and clients
- Instituted rules which increased the effectiveness of the development process and inner policies
- Worked in close collaboration with developers on a daily basis to create external documentation and technical specifications related to the company's interests
- An active member in providing services to clients until they were satisfied with the result
- Managed 10 to 15 active clients daily and 5 to 10 discussions with new clients (even from the top 10 banks in Moscow)

Ugis Group Ltd (IT business, Minsk, Belarus)

IT Lawyer, 09.2014 – 09.2016

- 3 to 4 hours daily was working in collaboration with developers who provide IT-outsourcing as the sole lawyer on staff
- Closed an average of 10 licenses per week for HP software solutions
- Coordinated with stakeholders to develop the company's regulations on the software creation process, which reduced the number of the uncontrolled use of open-source by developers

National Center of Intellectual Property, Belarus

Specialist of the department of law and international treaties, 09.2012 – 09.2014

- Served as a specialist at the institution which registers patents, software and makes the state regulations
- Took part in about 15 international discussions and made 5 analytical publications on the copyright, open-source, problem of software registration, modern legal challenges with IoT, licensing and application of international treaties
- Acquired knowledge on economic aspects of intellectual property objects and the ways to monetize and use them in business

IT legal solutions, Minsk, Belarus

IT legal intern, 02.2012 – 08.2012

- First and immediate practical acquaintance with IT law and the software development process
- Worked closely with a developer eventually learning the principles of the MSOffice extension for developers and the way to connect a form to the parser
- Combined legal acumen with simple developer knowledge to create live legal documents which would generate in response to the client's needs
