Summary

Experienced Front-end developer, passionate about immersive Web. Especially loves to work on most usable and pleasant interfaces and UX design. Skilled in modern front-end tools and has the motivation to constantly learn new technologies. Loves challenges and takes initiative. Inspired by team collaboration. Full of ideas and ever curious. Self taught.

Work experience

Sparkmate (cross-disciplinary engineering services, Paris, France)

Software developer, from 09.2019

- So far was a front-end lead on 6 long-term projects, assisted or implemented some features in other 4 projects.
- Managed backend part in 2 projects, mostly with Strapi.
- Assisted and managed several CI/CD GCP integration.
- Applying best practices, improving from project to project, prioritizing the code quality and efficiency.
- Using daily React, Next.js, git, gitlab. Started to switch to typescript.
- Being an frontend company's expert, act as an advocate in project development planning and prioritizing.
- Following client's request made from scratch and with 0 previous knowledge a webapp with an interactive 3D scene applying three.js library.
- Several projects were only/also native apps (applied react native) - for Android and iOS.
- Massive usage of Figma (this CV is made in Figma), Airtable, Miro, Canva, FB Workplace, Gitlab and other team tools.
- Gave a hand to teammates on several hardware projects.

Wild Code School (intensive training on IT professions, Paris, France)

Front-end course instructor, 12.2020 - 05.2021

- I was leading a front-end part-time course with several personal projects for each student.
- The course consisted of the following topics:
HTML, js (oop), css, scss, work with terminal, React js, hooks, express.js, mongoose, mongoDB, firebase, Auth, git, github, figma, miro, trello.
- For learning purposes, mocked with students the UI of popular websites: for instance, youtube.
- Students were with 0 to few knowledge on coding and half of them found work/practice before the course was finished.

Personal Projects

- Made several projects in Blender following recognised professionals tutorials and hints.
- Have a particular interest working with Unity. Could create an immersive scene, upload on oculus and successfully run it on the device.
- Developing a family app to track and share family dining plans and groceries lists
- Developing a brand new portfolio that is an interactive 3D scene
- As a volunteer made a website for belarusian diaspora in France (Project is based on WebFlow and uses CMS). Provide maintenance when needed and teach volunteers to update content.
- Created a real estate agency website with the appropriate luxury WordPress theme, with customized css and integrated contact form.
- Created a turn-based PC board game in plain JavaScript. Implemented full specification logic and made an interesting war game.
- Made a web application dependent on a user's current geographical position searches for local restaurants. The map, the list and the street view photos of restaurants were taken with Google maps API.

Legal experience

Innovative People Ltd (IT integrator and IT outsource, Moscow, Russia)

IT Lawyer, 06.2017 – 07.2019

The company has a wide range of competences in IT: integration of BPM solutions, automation of business with CRM and IT outsourcing. Worked with waterfall and agile methods.

- Communicated between all the company's IT professionals: developers, managers, stakeholders, financial officers and clients
- Instituted rules which increased the effectiveness of the development process and inner policies
- Worked in close collaboration with developers on a daily basis to create external documentation and technical specifications related to the company's interests
- An active member in providing services to clients until they were satisfied with the result
- Managed 10 to 15 active clients daily and 5 to 10 discussions with new clients (even from the top 10 banks in Moscow)

Ugis Group Ltd (IT business, Minsk, Belarus)

IT Lawyer, 09.2014 – 09.2016

- 3 to 4 hours daily was working in collaboration with developers who provide IT-outsourcing as the sole lawyer on staff
- Closed an average of 10 licenses per week for HP software solutions
- Coordinated with stakeholders to develop the company's regulations on the software creation process, which reduced the number of the uncontrolled use of open-source by developers

National Center of Intellectual Property, Belarus

Specialist of the department of law and international treaties, 09.2012 – 09.2014

- Served as a specialist at the institution which registers patents, software and makes the state regulations
- Took part in about 15 international discussions and made 5 analytical publications on the copyright, open-source, problem of software registration, modern legal challenges with IoT, licensing and application of international treaties
- Acquired knowledge on economic aspects of intellectual property objects and the ways to monetize and use them in business

IT legal solutions, Minsk, Belarus

IT legal intern, 02.2012 – 08.2012

- First and immediate practical acquaintance with IT law and the software development process
- Worked closely with a developer eventually learning the principles of the MSOffice extension for developers and the way to connect a form to the parser
- Combined legal acumen with simple developer knowledge to create live legal documents which would generate in response to the client's needs
